Election/Restrictions

1. Restriction to one of the following species is required under 35 U.S.C. 121:

Species I. Claims 1-20 and 38-41 draw to an apparatus and a method for an antenna system, among with other features, a frequency response of the antenna with two nulls, dielectric material having slots.

Species II. Claims 21-29 draw to an antenna, among with other features, first and second points and plurality of blocks

Species III. Claims 30-37 draw to a dual/multiple polarized antenna system, among with other features, first and second points in each pair of a plurality of pairs of first and second points coupled to a desired polarization of a transmitted/received signal in form of an electromagnetic wave.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 21 and 23-26 are generic for species II and III.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
